

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Add the following heading and paragraph immediately below the title:

--RELATED APPLICATION

This application is a divisional of co-pending U.S. application No. 09/676,878 filed September 29, 2000, and incorporated by reference herein.--

Amend the paragraph beginning on page 7, line 13 as follows:

In ~~an~~ a ninth aspect, the present invention is directed to a camouflaged structure located between a generally uniform background and a foreground, wherein the foreground contains visible light and a vantage point and has a generally uniform composition comprising characteristic wavelengths of visible light. The camouflaged structure includes a member having an exterior surface and a reflector having a reflective surface. The reflector is attached to the structure and is located adjacent the exterior surface and between the exterior surface and the vantage point. The reflective surface is positioned so that at least a portion of the visible light contained in the foreground is reflected to the vantage point. A filter is located between the vantage point and the reflective surface. The filter is for filtering at least one wavelength of visible light that is different from the characteristic wavelengths of visible light.
